MODIFICATION SERVICES

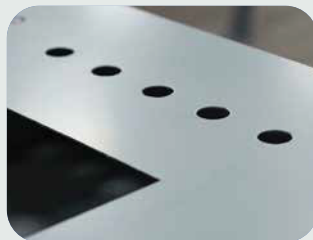

Ordering and receiving your modified standard enclosure has never been so easy.

With our new eCAB ModCenter, Revere can create holes and cut outs, for almost any standard enclosure, to your precise specifications, on time and on budget.

Enclosures up to 90" and Panels up to 72"x78"

Auto-Sketch based software allows for DXF import or drag and drop drawing creation

Ability to create precise holes and cutouts

Enclosure types: mild steel, stainless steel, non-metallic, aluminum, copper and more

Common applications: drilling, tapping cutouts, accessories, back panel modifications, window kits, and climate control devices
